

arQana Technologies signs Distribution Agreement with YOSUN

The deal provides mainland China, Taiwan and SEA territories access to arQana Technologies product families for 5G Wireless Infrastructure.

Taipei, TAIWAN, May 10, 2021 – arQana Technologies has entered into a distribution agreement with YOSUN, subsidiary of WPG Holdings who has recently taken the no.1 spot as world’s largest semiconductor distributor. Under the agreement, YOSUN is franchised for mainland China, Taiwan and South East Asia regions’ sales of arQana Technologies’ new 5G product families for Wireless Infrastructure, including its lines of High-Efficiency Power Amplifiers, Drivers, Front-End modules, Switches and Beamformer ICs.

arQana Technologies provides standard and custom product solutions for the Wireless Infrastructure market and is bringing into production an extensive range of high quality and cost-effective semiconductor product families, covering the most popular 5G frequency bands, including Sub-6 GHz and mmWave. YOSUN supports customers and suppliers with the delivery of electronic components, as well as tailored component-engineering support.

“Expanding our sales channels through our collaboration with YOSUN is critical for the growth of our company as it allows us to effectively cover and support key territories,” says Glenn Vandevoorde, CEO of arQana Technologies. “YOSUN’s key distribution network in Asia-Pacific and its exceptional customer support services will bring new opportunities to arQana Technologies, as we rapidly expand our global presence in the Wireless Infrastructure market.”

“We are very pleased to add arQana Technologies to our portfolio of industry-leading electronic manufacturers,” adds Mitchell Ho, CEO of YOSUN. “arQana’s innovative and expansive roadmap of RF, microwave and mmWave products is a high value-add to YOSUN’s existing line card. We look forward to supporting arQana’s growth trend, while at the same time increasing our product portfolio offering and continue to serve our customer needs in a fast-moving technology industry.”

This agreement benefits both companies through a larger sales team capable of supporting customers especially in mainland China, Taiwan and SEA regions with a higher level of application support, logistics and product inventory.

About arQana Technologies

arQana Technologies, headquartered in Singapore and with offices in Taiwan and Belgium, is a fabless semiconductor component supplier for the Wireless Telecommunication Infrastructure market. As the world is evolving fast towards 5G with new architectures and technical challenges ahead, arQana has been transforming its IP portfolio into a range of key high-performing products in different semiconductor technologies, to support the 5G market and ecosystem.

About YOSUN

YOSUN, based in Taiwan, was established in 1980 and is a subsidiary of WPG Holdings Group, the largest semiconductor distributor in the world. The company specializes in sales and real-time service support for semiconductor electronic components. To satisfy their customer needs, Yosun has established many regional offices and warehouses and set up a shared information platform to offer a fast and convenient acquisition of information. YOSUN proactively cooperates with suppliers and clients to ensure that suppliers produce products that fulfil clients' requirements and expectations, and thus generate successful relationships and a positive future outlook.
